

PACKAGED HEAT EXCHANGER ASSEMBLIES

FEATURES

- Custom designed to your requirements
- Frames for floor, wall or ceiling mounting
- Any manufacturer or style of heat exchanger can be supplied
- Optional high and/or low temperature alarms and/or cut-offs
- Optional high and/or low flow alarms and/or cut-offs

DESIGN SPECIFICATIONS

- Product to be heated or cooled (include specific heat and gravity if other than water)
- Pressure of product to be heated or cooled
- Allowable pressure drop of product to be heated or cooled
- Maximum and minimum flow rate of product to be heated or cooled
- Maximum and minimum inlet temperature of product to be heated or cooled
- Required outlet temperature (or range of temperatures) of product to be heated or cooled
- Heating or cooling medium ... steam, water, oil, glycol, etc ...
- Pressure of heating or cooling medium
- Allowable pressure drop across the package (no answer required if heating with steam)
- Inlet temperature of heating or cooling system
- Flow limitations of heating or cooling medium
- Environment ... indoor, outdoor, watertight, explosion-proof, etc. ...
- Special material requirements due to fluids or environment
- Dimensional concerns or limitations
- Brief description of application
